

AI search readiness audit: sample report

A real run on two of our own sites, so you can open every evidence link and check it. Read on 2026-10-09.

SITES CHECKED 2	AI CRAWLERS READ 14
BLOCKED 0	FIXES 5

Crawler access

The robots.txt rules each site publishes for the main AI crawlers. Both sites allow all 14 crawlers Site Check reads, with the rule Allow: /.

Site	GPTBot	ClaudeBot	PerplexityBot	Google-Extended
tools.openkrill.app	● Allowed	● Allowed	● Allowed	● Allowed
milliways.si	● Allowed	● Allowed	● Allowed	● Allowed

robots.txt is a request crawlers follow by choice. A firewall or CDN can still block a crawler by address, which this table does not show.

What AI tools find on the home page

Check	<code>tools.openkrill.app</code>	<code>milliways.si</code>
<code>llms.txt</code>	Found, titled Agent Tools	Found, titled Agent Market
<code>llms-full.txt</code>	Found	Not found (404)
AI instructions page	Found, linked from home	Not found
Share image	Found, 1200 × 630	Missing
Title and description	57 and 126 characters	61 and 170 characters
Summary near the top	Not found	Not found

Fix list, in order of impact

Each fix names the page that shows the problem, so you or your developer can check it before changing anything.

1 Add a share image to `milliways.si`

The home page has no `og:image`, so a link pasted into a chat or an AI answer shows no picture. Add a 1200 × 630 image and set the Twitter card to `summary_large_image`.

EVIDENCE

milliways.si/

2 Open both home pages with a 2 to 3 sentence summary

Neither home page has a short summary right under the title, the block an AI answer most often quotes.

EVIDENCE

tools.openkrill.app/

3 **Shorten the milliways.si title and description**

The title is 61 characters and the description 170. Search results cut them near 60 and 160, so the end of each is lost.

EVIDENCE

milliways.si/

4 **Give milliways.si an about page for AI assistants**

There is no page that says what the site is and who runs it, and no organisation byline. Link the page from the home page.

EVIDENCE

milliways.si/llms.txt

5 **Use one name in the tools.openkrill.app llms.txt**

The site calls itself OpenKrill and the file is titled Agent Tools. Title the file Agent Tools by OpenKrill so both names point at the same thing.

EVIDENCE

tools.openkrill.app/llms.txt

llms.txt draft

The draft SEO Audit wrote for milliways.si from its own public pages. A person edits it before it goes to you; here it is as the tool returned it.

Agent Market

> People buy and sell second-hand items through their AI agents. Agents list, search and bargain; both people approve a deal before it binds. No payment through the market.

Public pages of Agent Market, as read on 2026-10-09. Review this draft before publishing. It was not published by this tool.

Optional

- [Rules](https://milliways.si/rules)
- [Agent Tools API credits, 1 USD pack](https://milliways.si/listings/credits-1)
- [Agent Tools API credits, 5 USD pack](https://milliways.si/listings/credits-5)
- [Agent Tools API credits, 20 USD pack](https://milliways.si/listings/credits-20)
- [Privacy](https://milliways.si/privacy)

What the person changed

Site Check passed tools.openkrill.app on author credentials, but its evidence was menu text, not an author. The reviewer dropped that pass, which is why the report has no author fix for this site yet. Every audit gets the same read before it is sent.

WHAT THIS AUDIT CANNOT PROMISE

No one can promise that ChatGPT, Claude or Perplexity will cite a site. The audit checks what is in your control: whether AI crawlers may read your pages, what they find there, and what to fix first.

Get the same report for your site

Your site and up to 3 competitors, side by side: 149 USD per site, delivered within 48 hours of the deposit, paid through escrow. What you get is on the [AI search readiness audit](#) page.
